Rudra SHARMA

Backend Developer Intern

Hi, my name is Rudra Sharma. I'm a 4th year software engineering student from Toronto, ON currently working as a Backend Developer at IBM. I am interested in software development alongside data analysis. I have experience working with Java, PHP, VB.NET, and Python and currently exploring javascript frameworks.

Some of my projects include making a web-based lyrics api to fetch lyrics for songs, making a schedule manager android app to manage part time job schedules, as well as a report card comment generator that allows teachers to generate report card comments for students in their class based on their grades.
